

# Exercise 4.2

## Story Mapping

---

### Background:

In this exercise you will explore the web app creation capability of ArcGIS Online. In specific, you will learn:

- How to create a web app using the Story Map Template.

### *Step 1: Sign in to ArcGIS.com*

1. Open a Google Chrome web browser to [www.arcgis.com](http://www.arcgis.com) .
2. Sign in with the user name and password.

### *Step 2: Create a web app using Story Map Template*

1. In “My Content”, open the one of the web maps you have created in your last lab assignment.
2. Click “Share” to share with everyone, then click “Create a web app”. Browse through different web app template. In this exercise, it is recommended to select either “Story Map Journal”, or “Story Map Series”. Fill in the information required.
3. Feel free to use any customization options you’d like to choose in creating the web app. As long as you fulfill this 2 requirements:
  - a. The first section (or first page) of your app is an “Image” (select image in CONTENT). You can google a related image to put it as a title. Add some description about your story.
  - b. The second section of your app is a “Map”. Use the web map you built in last exercise, with some descriptions.  
Feel free to add more maps to make your story rich.
4. Add other contents if you like. Save your app once you are satisfied.
